IN THE CLAIMS:

1. (Original) A rippled wafer formed of a convoluted wafer ribbon, the rippled wafer having an average of at least 12 turns/$cm^2$, wherein a turn is a change in direction of the wafer ribbon of at least 45°.

2. (Original) A rippled wafer according to claim 1 having an average of at least 15 turns/ $cm^2$.

3. (Currently amended) A rippled wafer according to claim 1 ~~or 2~~ having an average of at least 20 turns/$cm^2$.

4. (Currently amended) A rippled wafer according to ~~any of~~ claim 1 ~~to 3~~ having an average of at least 25 turns/ $cm^2$.

5. (Currently amended) A rippled wafer according to ~~any preceding~~ claim 1, wherein a turn is a change in direction of the wafer ribbon of at least 90°.

6. (Currently amended) A rippled wafer according to ~~any preceding~~ claim 1, wherein a turn is a change in direction of the wafer ribbon of at least 135°.

7. (Currently amended) A rippled wafer according to ~~any preceding~~ claim 1, having a ratio of cross sectional edge length~~, as defined in the specification,~~ to average cross sectional area of greater than $2/r_e$~~, as defined in the specification~~.

8. (Currently amended) A rippled wafer according to ~~any preceding~~ claim 1, having a ratio of cross sectional edge length to average cross sectional area of at least $4/r_e$.

9. (Currently amended) A confectionery product comprising a rippled wafer according to ~~any preceding~~ claim 1.

10. (Original) A confectionery product comprising a rippled wafer formed of a convoluted wafer ribbon, wherein the turns are substantially uniformly distributed across the cross section of the rippled wafer, where a turn is a change in direction of the wafer ribbon of at least 45°.

11. (Original) A confectionery product comprising a three-dimensional rippled wafer formed in a single step.

12. (Currently amended) A confectionery product according to claim 10, ~~or 11~~ wherein the ratio of the cross sectional edge length~~, as defined in the specification,~~ to the average cross sectional area of the rippled wafer is greater than $2/r_e$~~, as defined in the specification~~.

13. (Currently amended) A confectionery product according to claim 10, ~~11 or 12~~ wherein the ratio of the cross sectional edge length to the average cross sectional area of the rippled wafer is at least $4/r_e$.

14. (Currently amended) A confectionery product according to ~~any of claims 10 to 13~~ claim 10, wherein the rippled wafer has an average of at least 12 turns/ $cm^2$.

15. (Original) A confectionery product according to claim 14 wherein the rippled wafer has an average of at least 14 turns/ $cm^2$.

16. (Currently amended) A confectionery product according to claim 14, ~~or 15~~ wherein the rippled wafer has an average of at least 20 turns / $cm^2$.

17. (Currently amended) A confectionery product according to ~~any of claims~~ claim 14, ~~to 16~~ wherein the rippled wafer has an average of at least 25 turns/ $cm^2$.

18. (Currently amended) A confectionery product according to ~~any of claims~~ claim10, ~~to 17~~ wherein a turn is a change in direction of the wafer ribbon of at least 90°.

19. (Currently amended) A confectionery product according to ~~any of claims~~ claim10, ~~to 18~~ wherein a turn is a change in direction of the wafer ribbon of at least 135°.

20. (Currently amended) A confectionery product according to ~~any of claims~~ claim 9, ~~to 19~~ further comprising a soft layer at least partly surrounding the rippled wafer and a hard shell.

21. (Original) A confectionery product according to claim 20 wherein the soft layer is a fat-based cream.

22. (Currently amended) A confectionery product according to claim 20, ~~or 21~~ wherein the hard shell is chocolate.

23. (Currently amended) A moulded confectionery product according to ~~any of claims~~ claim 9 ~~to 22~~.

24. (Currently amended) A petfood comprising a rippled wafer according to ~~any of claims~~ claim 1 ~~to 8~~.

25. (Cancelled)

26. (Cancelled)
